

## Cypress British Car Club of Monterey

### Cars and Coffee and Sand City Shop Tours

Saturday, March 16th

Once again the day was perfect for a drive out to Laguna Seca in the morning and a drive into Sand City for a shop tour of some of our members.

After the Cars and Coffee at Laguna Seca (there had to be at least 400 cars there) we drove to Sand City and parked in front of Inter City Manufacturing.

From there we walked over to Fred and Lorie Sanders Sculpture Works where Fred showed all his tools to make great looking BIG sculptures out of metal. He had albums laid out and some items he was working on in for local customers.

Next we headed over to Doug and Karen Learned's Inter City Manufacturing, a race car and race car parts business, that had every conceivable milling machine in the place. Doug showed us how he makes the Formula Ford race cars from the ground up and the machines that makes the parts for them. My favorite parts were the spoke wheels.

Then we walked down to Frank and Tina D'Aquanno's building which has the best Mural in town painted on it. Frank talked about how he got into race cars and racing. We also saw hi Elva up on the rack which he'll be racing this weekend at Laguna Seca! The best part of the shop is the huge sign he has from the Laguna Seca Race Track that he got when they transitioned from Mazda to Weathertech sponsorship. Great saving of an historical piece in my opinion.

We then drove or walked to Sweet Elena's for a little nosh. Best lattes in town.

Good day to be an owner of a British Car.
